

Join Us!

Membership and participation in WACTE provides interdependence for continuous improvement as an administrator, instructor, educator, support assistant, or business partner. The whole of the sum is greater than any single part. Mixing, teaming, and collaborating with colleagues in print and at seminars, workshops, and conferences leads to greater educational health and quality of the institution, the educator and ultimately the customers-learners.

"The WACTE organization has provided me a network to many new professionals dedicated to Career and Technical Education. I value my membership and encourage you to join as well."

Joe Ciontea
Executive Director,
Wisconsin Technology
Education Association

Get Connected!

Grow Professionally

- The Wisconsin Association for Career and Technical Education provides quality professional development opportunities promoting personal and professional growth.
- Members can earn college credit and industry certification by participating in technical training programs.

Stay Informed

- Keep current on the changes in the field of career and technical education. WACTEonline.org provides information on current events, best practices, professional development opportunities, legislative action, and career connections!

Support Excellence

- The Career and Technical Education message is spread through the media by producing favorable stories and circulating them throughout state publications, internet websites and professional association networking.
- WACTE is supported by state leaders in education, business, industry and labor organizations.
- Members earn recognition through the Wisconsin Career and Technical Education Awards program for secondary and post-secondary education.
